DOLLTT

Litepaper · Version 1.0 · October 2026

DOLLTT (ticker: DOLLTT) is a BEP20 utility token on BNB Smart Chain with a fixed total supply of **45,000,000,000** tokens. It is designed as a straightforward, transparent digital asset: no minting, no hidden functions, verified contract source, and real on-chain utility through staking rewards and community airdrops. DOLLTT is being developed as the native asset of the Didar messaging ecosystem, where it will power in-app rewards, premium features and transfers — demand rooted in real usage, not speculation alone.

Utility & Security

- **Staking:** holders can stake DOLLTT in the official staking contract and earn a fixed **20% APY**, paid in DOLLTT from the fully funded 4,000,000,000-token reward pool. Rewards accrue per second; stake, withdraw and claim at any time.
- **Airdrop:** 100,000,000 DOLLTT allocated to the community - **1,000,000 DOLLTT per wallet**, claimable once per address through the official airdrop contract.
- **Liquidity:** a DOLLTT/BNB liquidity pool is live on PancakeSwap V2.
- **Security:** built on OpenZeppelin's audited ERC20 implementation. There is **no mint, pause, blacklist or tax function** - the 45 billion tokens were created once at deployment and no new tokens can ever be created by anyone, including the founding team.
