

DOLTT (DOLTT)

A fixed-supply, transparent token with real on-chain utility

DOLTT (DOLTT) is a BEP20 utility token on BNB Smart Chain with a fixed total supply of 45,000,000,000 tokens. It is designed as a straightforward, transparent digital asset: no minting, no hidden functions, verified contract source, and real on-chain utility through staking rewards and community airdrops. DOLTT is built to grow into the native asset of the Didar messaging ecosystem.

Token	DOLTT (DOLTT)
Network	BNB Smart Chain (BEP20)
Total supply	45,000,000,000 (fixed)
Decimals	18
Contract	0x2Cc111c75101dA05c010287612CFdBa1f874F7b

1. Abstract

DOIITT (DOLTT) is a BEP20 utility token on BNB Smart Chain with a fixed total supply of 45,000,000,000 tokens. It is designed as a straightforward, transparent digital asset: no minting, no hidden functions, verified contract source, and real on-chain utility through staking rewards and community airdrops. DOIITT is built to grow into the native asset of the Didar messaging ecosystem.

2. Vision

Most new tokens launch on promises. DOIITT launches on proof: a verified contract, public liquidity, working staking, and a live airdrop - all deployed before asking anyone for trust. The long-term vision is a token with genuine everyday utility inside the Didar messenger app (in-app rewards, premium features, and transfers), giving DOLTT demand rooted in real usage rather than speculation alone.

3. Tokenomics

Parameter	Value
Name	DOIITT
Symbol	DOLTT
Standard	BEP20 (BNB Smart Chain)
Total supply	45,000,000,000 (fixed - can never increase)
Decimals	18
Mint function	None (supply is immutable)
Contract	0x2Cc111c75101dA05c010287612CFdBa1f874F7b (source verified)

3.1 Supply allocation

Allocation	Amount (DOLTT)	Share
Liquidity pool (PancakeSwap V2)	~3,300,000,000	~7.3%
Staking reward pool	4,000,000,000	~8.9%
Airdrop & community	100,000,000	~0.2%
Team & development reserve	~37,600,000,000	~83.6%

The reserve funds future exchange listings, ecosystem development, marketing, and additional community rounds. All allocations are visible on-chain.

4. Technology & Security

- **Standard implementation:** DOLTT uses OpenZeppelin's audited ERC20 implementation, fully compatible with the BEP20 standard on BNB Smart Chain.
- **Verified source:** the contract source code is published and verified on BscScan (exact match).
- **No privileged functions:** there is no mint, pause, blacklist, or tax function. What you see is what the token does - transfer value.
- **Fixed supply:** 45 billion tokens were minted once at deployment to the deployer address. No new tokens can ever be created by anyone, including the founding team.

5. Staking

DOLTT holders can stake their tokens in the official staking contract and earn a fixed **20% APY**, paid in DOLTT from a dedicated 4,000,000,000-token reward pool funded by the team.

Staking contract: 0xD0FF26cd13021d983DF6B1B60d40720E070068cC

- Reward pool: 4,000,000,000 DOLTT (fully funded on-chain)
- Rewards accrue per second; users can stake, withdraw, and claim at any time
- When the reward pool is depleted, staking rewards end - the pool cannot be inflated

Staking locks circulating supply and rewards long-term holders, aligning holder incentives with the project's growth.

6. Airdrop & Community

To bootstrap a broad holder base, 100,000,000 DOLTT was allocated to a public airdrop: **1,000,000 DOLTT per wallet**, claimable once per address through the official airdrop contract. Unclaimed tokens can be reclaimed by the team for future community rounds.

Airdrop contract: 0xe16576E4B9C127c6e288bEce12Cc746D2ed6e1f4

Community coordination happens in the official Telegram channel, where the team publishes regular project updates.

7. Roadmap

- ✓ Token deployment (BNB Smart Chain mainnet)
- ✓ Contract source verification
- ✓ PancakeSwap V2 liquidity
- ✓ Staking contract (20% APY) - live and funded
- ✓ Airdrop contract - live and funded
- ☐ BscScan token information approval (in review)
- ☐ Liquidity lock (public commitment against rug-pull)
- ☐ CoinGecko / CoinMarketCap listings
- ☐ DOLTT integration into the Didar messenger app (rewards, premium, transfers)
- ☐ Centralized exchange listings

8. Transparency

- All contract addresses are published on the official website and Telegram channel.
- The team holds a large reserve; any major movement will be announced in advance.
- Beware of imitators: always verify the contract address 0x2Cc111c75101dA05c010287612CFfdBa1f874F7b before interacting. The team will never ask for your seed phrase or private key.
